## TECHNICAL DATA SHEET

# Coolant Concentrated

### DESCRIPTION

Coolant concentrate is a high-performance fluid designed to be mixed with water for use in automotive cooling systems. Formulated with corrosion inhibitors and antifreeze agents, it prevents engine overheating, maintains optimal temperature, and protects against rust and freezing. Diluting as per instructions ensures efficient heat transfer and system longevity.

### FEATURES AND ADVANTAGES

- Anti-rust & anti-freeze
- Lubricants moving part
- Concentrated for better cooling

### PRODUCT PERFORMANCE CLAIMS

-GLOBALUBE COOLANT HELPS TO PROTECT THE ENGINE AND COOLING SYSTEM FROM CORROSION, BOILING AND FROST DAMAGE WHILE KEEPING THE SYSTEM CLEAN FOR OPTIMUM PERFORMANCE.

| PARAMETER         | METHOD     | UNIT              | TYPICAL RESULT |
|-------------------|------------|-------------------|----------------|
| Concentration     | -          | -                 | 30%            |
| Colour            | VISUAL     |                   | Yellow         |
| Active Ingredient | -          | % weight          | 30             |
| Density @ 20°C    | ASTM D5931 | g/cm <sup>3</sup> | 1042           |
| Pour Point        | -          | °C                | -18            |

### HEALTHY AND SAFETY

Based on available information, no adverse health effects are expected when this product is used for its intended applications and the recommendations provided in the Material Safety Data Sheet (MSDS) are followed. MSDS requests are available through your sales contract office or via the Internet. This product should not be used for purposes other than its intended use. If handling used products, take care to protect the environment.
